

# FINANCE & OPERATIONS DIRECTOR

Based Edinburgh

Competitive Salary, plus Equity

---

Our client is a small, but fast growing and profitable privately owned business established three years ago by its founder and CEO. It is an internet-based health business and has recently taken on venture capital investment to fund growth.

This 'dual' role will provide focus and leadership for the general management of the business as well as for the finance function, IT, logistics, stock management, budget planning and fulfillment. Ultimately the focus will be on growth, working capital management and profitability improvement – leading eventually to sale and value creation for shareholders.

Candidates will be well qualified, suitably experienced and able to work effectively in a dynamic, fast paced and youthful environment. You must be streetwise, a natural communicator, a team player and a commercially minded business person who, in due course, could become the CEO. A competitive salary will be on offer – but we are looking for someone who is just as interested in becoming a shareholder and who can both feel and take ownership for the business.
